## -/ New rejuvenating treatment at Imaderm

Geneva-based medical beauty centre Imaderm is offering a brand new treatment in Australia: Intra

**Intra**ceuticals oxygen therapy, a natural skincare system using pressurised oxygen – a star ingredient that puts injections in the shade.

Oxygen therapy makes suffering to be beautiful a thing of the past. Intra

**Intra**ceuticals Oxygen is a delicate, relaxing treatment that's going down a storm across the Atlantic.

Designed to revitalise four parts of the body – face, neck, chest and hands – this creating complex delivers its beneficial effects through serums enriched with vitamins and acid carried in hyperbaric (pressurised) oxygen.

Jets of oxygen under light pressure are blown onto the skin through a nozzle, stimulating micro-sized oxygen bubbles. This synergetic combination of actives rejuvenates improves its cell metabolism and hydrates it down to the deepest layers. Oxygen the perfect way to achieve a glowing, radiant complexion, to tackle acne and impurities, smooth out wrinkles and fine lines.

The results are visible from the first treatment session: your skin looks smoother, firmer, healthier.

A whole host of stars have tested it out for you and swear by it, including Madonna, Paltrow, Eva Longoria, Bar Refaeli, Gwen Stefani and Justin Timberlake!
